

Safe Zones of Fire

By Dr. David M. Knotts
Art by D. Michael Knotts

To demonstrate zones of fire, mark off individual shooter zones with masking tape or cord. The instructor uses a flashlight to cast a beam on a wall to simulate a bird or rabbit. The students use a deactivated firearm, Daisy Lazer Ed* rifle, or a broom stick and simulate shooting the object when it is in the proper zone of fire.

* Daisy Lazer Ed rifle (laser beam is emitted from the barrel when the trigger is depressed) - can be ordered from Daisy Outdoor Products, PO Box 220, Rogers, Arkansas 72757-0220; tel: 800-713-2479; fax: 501-621-4238.
